Dedication

To Phil Schlaman, my best friend and essential social support;
You make it all worthwhile.
—Nyla R. Branscombe

To the people I care about most and who care most about me—
Rebecca, Ted, Melissa, Samantha, Randy, Paul and Leah;
And to the colleagues who helped make my life’s journey such a happy one—
Donn Byrne, Roger Black, Jim Naylor, John Capaldi, and Mike Morris
—Robert A. Baron

Acknowledgements xv  
About the Authors xvi  

1 Social Psychology  
The Science of the Social Side of Life  

1.1: Social Psychology: What It Is and Is Not  
1.1.1: Social Psychology Is Scientific in Nature  
1.1.2: Social Psychology Focuses on the Behavior of Individuals  
1.1.3: Social Psychology Seeks to Understand the Causes of Social Behavior  
1.1.4: The Search for Basic Principles in a Changing Social World  

1.2: Social Psychology: Advances at the Boundaries  
1.2.1: Cognition and Behavior: Two Sides of the Same Social Coin  
1.2.2: The Role of Emotion in the Social Side of Life  
1.2.3: Social Relationships: How Important They Are for Well-Being  
1.2.4: Social Neuroscience: The Intersection of Social Psychology and Brain Research  
1.2.5: The Role of Implicit (Nonconscious) Processes  
1.2.6: Taking Full Account of Social Diversity  

1.3: How Social Psychologists Answer the Questions They Ask: Research as the Route to Increased Knowledge  
1.3.1: Systematic Observation: Describing the World Around Us  
1.3.2: Correlation: The Search for Relationships  
1.3.3: The Experimental Method: Knowledge Through Systematic Intervention  
1.3.4: Further Thoughts on Causality: The Role of Mediating Variables  
1.3.5: Meta-Analysis: Assessing a Body of Knowledge  

1.4: The Role of Theory in Social Psychology  
1.5: The Quest for Knowledge and the Rights of Individuals: Seeking an Appropriate Balance  
1.6: Getting the Most Out of This Book: A User’s Guide  

Summary and Review  

2 Social Cognition  
How We Think About the Social World  

2.1: Heuristics: How We Employ Simple Rules in Social Cognition  
2.1.1: Representativeness: Judging by resemblance  
2.1.2: Availability: “If I Can Recall Many Instances, They Must Be Frequent?”  
2.1.3: Anchoring and Adjustment: Where You Begin Makes a Difference  
2.1.4: Status Quo Heuristic: “What Is, Is Good”  

What Research Tells Us About... People’s Preference for the Status Quo  

2.2: Schemas: Mental Frameworks for Organizing Social Information  
2.2.1: The Impact of Schemas on Social Cognition: Attention, Encoding, Retrieval  
2.2.2: Priming: Which Schema Guides Our Thought?  
2.2.3: Schema Persistence: Why Even Discredited Schemas Can Influence Thought and Behavior  
2.2.4: Reasoning by Metaphor: How Social Attitudes and Behavior Are Affected by Figures of Speech  

2.3: Automatic and Controlled Processing in Social Thought  
2.3.1: Automatic Processing and Automatic Social Behavior  
2.3.2: Benefits of Automatic Processing: Beyond Mere Efficiency  

2.4: Potential Sources of Error in Social Cognition: Why Total Rationality Is Rarer Than You Think  
2.4.1: Our Powerful Tendency to Be Overly Optimistic  
2.4.2: Situation-Specific Sources of Error in Social Cognition: Counterfactual Thinking and Magical Thinking  

2.5: Affect and Cognition: How Feelings Shape Thought and Thought Shapes Feelings  
2.5.1: The Influence of Affect on Cognition  
2.5.2: The Influence of Cognition on Affect  
2.5.3: Affect and Cognition: Social Neuroscience Evidence for Two Separate Systems  

What Research Tells Us About... Why Not Controlling Ourselves Can Make Us Feel Good  

Summary and Review  

3 Social Perception  
Seeking to Understand Others  

3.1: Nonverbal Communication: An Unspoken Language  
3.1.1: Basic Channels of Nonverbal Communication  
3.1.2: Nonverbal Cues in Social Life  
3.1.3: Recognizing Deception  

Summary and Review
4 The Self
Answering the Question “Who Am I?”

4.1: Self-Presentation: Managing the Self in Different Social Contexts
   4.1.1: Self–Other Accuracy in Predicting Our Behavior
   4.1.2: Self-Presentation Tactics

4.2: Self-Knowledge: Determining Who We Are
   4.2.1: Introspection: Looking Inward to Discover the Causes of Our Own Behavior
   4.2.2: The Self from the Observer’s Standpoint

4.3: Personal Identity Versus Social Identity
   4.3.1: Who I Think I Am Depends on the Social Context
   4.3.2: Basic Sources of Error in Attribution Theory

4.4: Social Comparison: How We Evaluate Ourselves
   4.4.1: Self-Serving Biases and Unrealistic Optimism

4.5: Self-Esteem: Attitudes Toward Ourselves
   4.5.1: The Measurement of Self-Esteem
   4.5.2: How Migration Affects Self-Esteem
   4.5.3: Do Women and Men Differ in Their Level of Self-Esteem?

4.6: The Self as a Target of Prejudice
   4.6.1: Concealing Our Identity: How Well-Being Can Suffer
   4.6.2: Overcoming the Effects of Stereotype Threat

5 Attitudes
Evaluating and Responding to the Social World

5.1: Attitude Formation: How Attitudes Develop
   5.1.1: Classical Conditioning: Learning Based on Association
   5.1.2: Instrumental Conditioning: Rewards for the “Right” Views
   5.1.3: Observational Learning: Learning by Exposure to Others

5.2: How Do Attitudes Guide Behavior?
   5.2.1: Role of the Social Context in the Link Between Attitudes and Behavior
   5.2.2: Strength of Attitudes
   5.2.3: Attitude Extremity: Role of Vested Interests
   5.2.4: Attitude Certainty: Importance of Clarity and Correctness
   5.2.5: Role of Personal Experience

5.3: How Do Attitudes Influence Behavior?
   5.3.1: Attitudes Arrived at Through Reasoned Thought
   5.3.2: Attitudes and Spontaneous Behavioral Reactions

5.4: The Science of Persuasion: How Attitudes Are Changed
   5.4.1: Persuasion: Communicators, Messages, and Audiences
   5.4.2: The Cognitive Processes Underlying Persuasion

5.5: Resisting Persuasion Attempts
   5.5.1: Reactance: Protecting Our Personal Freedom
   5.5.2: Forewarning: Prior Knowledge of Persuasive Intent
   5.5.3: Selective Avoidance of Persuasion Attempts
   5.5.4: Actively Defending Our Attitudes: Counterarguing Against the Competition
   5.5.5: Individual Differences in Resistance to Persuasion
   5.5.6: Ego-Depletion Can Undermine Resistance

5.6: Cognitive Dissonance: What Is It and How Do We Manage It?
   5.6.1: Dissonance and Attitude Change: The Effects of Induced Compliance
   5.6.2: Alternative Strategies for Resolving Dissonance
   5.6.3: When Dissonance Is a Tool for Beneficial Changes in Behavior

6 Causes and Cures of Stereotyping, Prejudice, and Discrimination

6.1: How Members of Different Groups Perceive Inequality

6.2: The Nature and Origins of Stereotyping
6.2.1: Stereotyping: Beliefs About Social Groups
6.2.2: Is Stereotyping Absent If Members of Different Groups Are Rated the Same?
6.2.3: Can We Be Victims of Stereotyping and Not Even Recognize It: The Case of Single People
6.2.4: Why Do People Form and Use Stereotypes?

6.3: Prejudice: Feelings Toward Social Groups
6.3.1: The Origins of Prejudice: Contrasting Perspectives

What Research Tells Us About... The Role of Existential Threat in Prejudice
6.4: Discrimination: Prejudice in Action
6.4.1: Modern Racism: More Subtle, but Just as Harmful

6.5: Why Prejudice Is Not Inevitable: Techniques for Countering Its Effects
6.5.1: On Learning not To Hate
6.5.2: The Potential Benefits of Contact
6.5.3: Recategorization: Changing the Boundaries
6.5.4: The Benefits of Guilt for Prejudice Reduction
6.5.5: Can We Learn to “Just Say No” to Stereotyping and Biased Attributions?
6.5.6: Social Influence as a Means of Reducing Prejudice

Summary and Review

7 Liking, Love, and Other Close Relationships
7.1: Internal Sources of Liking Others: The Role of Needs and Emotions
7.1.1: The Importance of Affiliation in Human Existence: The Need to Belong
7.1.2: The Role of Affect: Do Our Moods Play a Role in Liking Others?

7.2: External Sources of Attraction: The Effects of Proximity, Familiarity, and Physical Beauty
7.2.1: The Power of Proximity: Unplanned Contacts
7.2.2: Physical Beauty: Its Role in Interpersonal Attraction

What Research Tells Us About... Dramatic Differences in Appearance Between Partners: Is Love Really Blind?
7.3: Sources of Liking Based on Social Interaction
7.3.1: Similarity: Birds of a Feather Actually Do Flock Together
7.3.2: Reciprocal Liking or Disliking: Liking Those Who Like Us
7.3.3: Social Skills: Liking People Who Are Good at Interacting with Others
7.3.4: Personality and Liking: Why People with Certain Traits Are More Attractive Than Others
7.3.5: What Do We Desire in Others? Gender Differences and Changes over Stages of a Relationship
7.4: Close Relationships: Foundations of Social Life

8 Social Influence
8.1: Conformity: How Groups—and Norms—Influence Our Behavior
8.1.1: Social Pressure: The Irresistible Force?

What Research Tells Us About... How Much We Really Conform
8.1.2: How Social Norms Emerge
8.1.3: Factors Affecting Conformity
8.1.4: Social Foundations of Conformity: Why We Often Choose to “Go Along”
8.1.5: The Downside of Conformity
8.1.6: Reasons for Nonconformity: Why We Sometimes Choose “Not to Go Along”
8.1.7: Minority Influence: Does the Majority Always Rule?

8.2: Compliance: To Ask—Sometimes—Is to Receive
8.2.1: The Underlying Principles of Compliance
8.2.2: Tactics Based on Friendship or Liking
8.2.3: Tactics Based on Commitment or Consistency
8.2.4: Tactics Based on Reciprocity
8.2.5: Tactics Based on Scarcity
8.2.6: Do Compliance Tactics Work?

What Research Tells Us About... Using Scarcity to Gain Compliance
8.3: Obedience to Authority: Would You Harm Someone If Ordered to Do So?
8.3.1: Obedience in the Laboratory
8.3.2: Why Destructive Obedience Occurs
8.3.3: Resisting the Effects of Destructive Obedience

8.4: Unintentional Social Influence: How Others Change Our Behavior Even When They Are Not Trying to Do So
8.4.1: Emotional Contagion
8.4.2: Symbolic Social Influence
8.4.3: Modeling: Learning from Observing Others

Summary and Review

9 Prosocial Behavior
9.1: Why People Help: Motives for Prosocial Behavior
9.1.1: Empathy-Altruism: It Feels Good to Help Others
viii Contents

9.1.2: Negative-State Relief: Helping Can Reduce Unpleasant Feelings 299
9.1.3: Empathic Joy: Feeling Good by Helping Others 299
9.1.4: Competitive Altruism: Why Nice People Sometimes Finish First 300
9.1.5: Kin Selection Theory 301
9.1.6: Defensive Helping: Helping Outgroups to Reduce Their Threat to Our Ingroup 302
9.2: Responding to an Emergency: Will Bystanders Help?
9.2.1: Helping in Emergencies: Apathy—or Action? 303
9.2.2: Is Therapeutic Help Always Best? 304
9.2.3: Key Steps in Deciding to Help—Or Not 305
9.3: Factors That Increase or Decrease the Tendency to Help
9.3.1: Factors That Increase Prosocial Behavior 309
9.3.2: Factors That Reduce Helping 312
9.4: Crowdfunding: A New Type of Prosocial Behavior
9.4.1: Emotion and Prosocial Behavior: Mood, Feelings of Elevation, and Helping 317
9.4.2: Gender and Prosocial Behavior: Do Women and Men Differ? 319
9.5: Final Thoughts: Are Prosocial Behavior and Aggression Opposites? 320

Summary and Review 322

10 Aggression

Its Nature, Causes, and Control 323

10.1: Perspectives on Aggression: In Search of the Roots of Violence
10.1.1: The Role of Biological Factors: Are We Programmed for Violence? 326
10.1.2: Drive Theories: The Motive to Harm Others 328
10.1.3: Modern Theories of Aggression 329
10.2: Causes of Human Aggression: Social, Cultural, Personal, and Situational
10.2.1: Basic Sources of Aggression: Frustration and Provocation 331
What Research Tells Us About... The Role of Emotions in Aggression
10.2.2: Social Causes of Aggression 333
10.2.3: Why Some People Are More Aggressive Than Others 334
10.2.4: Gender and Aggression: Are Men More Aggressive Than Women? 339
10.2.5: Situational Determinants of Aggression: The Effects of Heat, Alcohol, and Gun Availability 341
10.3: Aggression in the Classroom and Workplace
10.3.1: What Is Bullying? 346

Summary and Review 346

10.3.2: Cyberbullying: Electronic Means of Harm Doing 348
10.3.3: Can Bullying Be Reduced? 348

What Research Tells Us About... Workplace Aggression 350
10.4: The Prevention and Control of Aggression: Some Useful Techniques
10.4.1: Punishment: Revenge or Deterrence? 351
10.4.2: Self-Regulation: Internal Mechanisms for Restraining Aggression 353
10.4.3: Catharsis: Does “Blowing Off Steam” Really Help? 354
10.4.4: Reducing Aggression by Thinking Nonaggressive Thoughts 355

Summary and Review 356

11 Groups and Individuals

The Consequences of Belonging 358
11.1: Groups: When We Join... and When We Leave
11.1.1: Groups: Their Key Components 361
11.1.2: The Benefits—and Costs—of Joining 363
What Research Tells Us About... Dissent and Criticism of Our Groups—“Because We Care” 372
11.2: Effects of the Presence of Others: From Task Performance to Behavior in Crowds
11.2.1: Social Facilitation: Performing in the Presence of Others 374
11.2.2: Social Loafing: Letting Others Do the Work 377
11.2.3: Effects of Being in a Crowd 378
11.3: Coordination in Groups: Cooperation or Conflict?
11.3.1: Cooperation: Working with Others to Achieve Shared Goals 381
11.3.2: Responding to and Resolving Conflicts 383
11.4: Perceived Fairness in Groups:
Its Nature and Effects 386
11.4.1: Rules for Judging Fairness: Distributive, Procedural, and Transactional Justice 386
What Research Tells Us About... The Importance of Being Treated with Respect 387
11.5: Decision Making by Groups:
How It Occurs and the Pitfalls It Faces
11.5.1: The Decision-Making Process: How Groups Attain Consensus 389
11.5.2: The Downside of Group Decision Making 390
11.6: The Role of Leadership in Group Settings 393
Summary and Review 396

12 Dealing with Adversity and Achieving a Happy Life 398

12.1: Social Sources of Stress and Their Effects on Personal Well-Being 400
12.1.1: The Impact of Social Relationships on Health 400
Contents

12.1.2: How Self-Views Affect Outcomes 404
12.1.3: The Struggle to “Belong” 406
12.2: Social Tactics for Decreasing the Harmful Effects of Stress 408
12.2.1: Using Social Groups to Improve Health 409
12.2.2: Social Identification as a Means for Managing Stress 408
12.2.3: Accepting Ourselves 408
What Research Tells Us About... Reducing Post-Traumatic Stress Among Veterans 411
12.3: Making the Legal System More Fair and Effective 414
12.3.1: Social Influence in the Legal Process 414
12.3.2: The Influence of Prejudice and Stereotypes in the Legal System 414
12.4: Fostering Happiness in Our Lives 418
12.4.1: How Happy Are People, in General? 418
12.4.2: Factors That Influence Happiness 422
12.4.3: Does Monetary Wealth Create Happiness? 422
12.4.4: Is Happiness Getting What You Want or Enjoying What You Have? 425
12.4.5: Differences Between Happy and Unhappy People 425
What Research Tells Us About... The Relationship Between Emotions and Life Satisfaction Within Different Cultures 427
12.4.6: Benefits of Happiness 428

Preface

Social Psychology in a Changing World

“Education is the most powerful weapon which you can use to change the world.”

—Quote by Nelson Mandela

“As we go forward, I hope we’re going to continue to use technology to make really big differences in how people live and work.”

—Quote by Sergey Brin, co-founder of Google

“Psychology cannot tell people how they ought to live their lives. It can, however, provide them with the means for effecting personal and social change.”

—Quote by Albert Bandura

The aims identified in these quotations are truly impressive ones, and we most assuredly share their faith in the transformative power of education. We agree that equipping people with new ways of understanding themselves and interacting with the world has far-reaching consequences. And—more importantly—we believe that social psychology does provide powerful means of comprehending why people think, feel, and act as they do, and these ideas, in turn, illuminate how the social world shapes who we are and the processes by which we can achieve change, in ourselves and the social world. As you know, the goal of changing the world through technology, at least in terms of its implications for how we interact with other people and access our accumulated knowledge, has in fact been met—to “google” something has become a verb in everyday language, and Facebook and other social media have changed much about how we interact with each other. Just try to imagine life without the many forms of social media we use practically every hour of every day. Probably you cannot because digital technology has become woven into the very fabric of our lives so that we take them for granted and use them as though they are extensions of ourselves. While the founders of Google and Facebook sought to change how people interact with the world, social psychologists seek to illuminate the many “hidden processes” that shape how people influence each other. By providing you with a comprehensive overview of social psychological theory and research, we believe the information in this book offers you a valuable means of learning about yourself and the social world in which we live.

The social world, which is the primary focus of this book, has changed tremendously in recent years, perhaps more quickly and dramatically than at any time in the past. That includes how we interact with each other, and a key point we will emphasize throughout the book is this: These changes have important implications for how we think about ourselves and other people. Social psychology is the branch of psychology that studies all aspects of our behavior with and toward others, our feelings and thoughts about them, and the relationships we develop with them. The central message for social psychology as a field, and for any book that seeks to represent it, is simple: Keep up with these technological changes in terms of their implications for social life, and this is precisely what we do with this 14th edition.

We are happy to report that social psychology provides many important insights crucial to understanding the social changes we have described thus far and can provide you with the means of understanding how to create further—and beneficial—social change. The field continues to be the vibrant and adaptable one it has always been and, we predict, always will be. The scope of social psychological research (and knowledge acquired) has expanded rapidly in the past few years—in fact, much has been learned since the publication of the previous edition of this book—and this new edition fully reflects the many changes now occurring all over the world.

Our central goal for this new edition was to illustrate just how well our field has—and does—adjust to and reflect the changing social world. Technology is not simply changing the way we carry out certain tasks: It is also changing the way we live and—most important—how we interact with each other. Although many basic principles of social life remain, in essence, unchanged—for instance, the nature of love, hate, and emotions in-between—the ways in which these principles are expressed and experienced have changed drastically.

So, how, precisely, did we set out to reflect these major trends while fully and accurately describing the core of our field—the knowledge and insights that social psychologists have gathered through decades of systematic research? As the 2015 White House Social and Behavioral Sciences Team Report indicates, social psychological research consists of an impressive body of knowledge about how people actually think, feel, and behave toward other people, and the
accumulated knowledge identifies how changing social conditions can influence those responses, often with an eye to improving life for us all. Indeed, social psychological research has taught us much about the “human animal” that can and is being fruitfully applied in numerous domains. That is precisely what we aimed to do with this edition—illustrate how understanding social psychological processes can help to improve many aspects of life. The following is a summary of the major steps we took to accomplish these important goals.

**Changes in Content**

**An Entirely Revamped Chapter Based on “the Science of Happiness”**

Dealing with Adversity and Achieving a Happy Life (Chapter 12)

This capstone chapter is ambitious and entirely consistent with the theme of the 14th edition: Education for achieving change. We believe that social psychology can help you deal with the stresses of life and serve to guide you on the way toward achieving greater happiness. That’s a tall order, but our field can indeed now provide the central ingredients for thinking about ourselves in ways that can help us be resilient when we enter new social environments and provide insight with specific strategies that, when put into practice, will improve people’s well-being. Here’s what you can learn from this greatly revised chapter (Chapter 12):

*Can people be too happy? What roles do culture and age play in defining the meaning of happiness? What do we know about how the happiness of people in different nations can be improved? And, how do we turn adversity into strength and achievement? This chapter describes what social psychologists, with their comprehensive approach to understanding social life, have discovered, and this knowledge can help you in your quest to build the happy and fulfilling life we all seek. We think that some of the findings we will present are indeed surprising—for instance, the fact that increasing wealth does not necessarily make people happier, but investing in social relationships does indeed make people happier. We believe that this is a unique and important aspect of this text and one that is fully consistent with the practical credo that social psychology, as a field, has always embraced.*

**Changes in Content Within Each of the Chapters**

Continuing a long tradition in which each edition of this textbook has included literally dozens of new topics, this 14th edition is indeed “new.” In every chapter, we present new lines of research, new findings, and new theoretical perspectives. Here is a partial list of the new topics included:

**Chapter 1**

- An increased emphasis on the importance of social relationships for psychological well-being.
- An entirely new section on the importance of meta-analysis in assessing an existing body of knowledge on a topic.
- A new emphasis on how cultural factors shape our conceptions of the self and how that in turn affects individuals’ comfort and ability to navigate different social settings.

**Chapter 2**

- A new section on heuristic use under conditions of economic threat.
- A new section on the “portion size effect” and how eating can reflect inadequate adjustment from a high anchor.
- A new emphasis on how cultural factors shape our conceptions of the self and how that in turn affects individuals’ comfort and ability to navigate different social settings.

- New research on belief in free will and its implications for counterfactual thinking.

**Chapter 3**

- A new section on why we find it difficult to recognize deception in others.
- A new discussion of attributions and terrorism—how perpetrators explain their actions.
- New research on how first impressions are revised over time.
Chapter 4
• An entirely new section addresses how trying to conceal our identity can inhibit social interaction and harm well-being.
• New research addresses why introspection fails, and particularly why people apparently don’t know that spending their money on others can make them happier than spending it on themselves.
• An entirely new section on how migration affects self-esteem—both international and domestic moves by students.

Chapter 5
• New research concerning the role of reactance in students’ responses to instructor behaviors in the classroom.
• New research addressing how attitudes can be conditioned nonconsciously.
• New research examining when people’s behavior reflects their abstract values and when it is based on their economic self-interests.

Chapter 6
• New coverage of how racial group membership affects responses to issues concerning police treatment of citizens.
• New research concerning how groups maintain a favorable view of themselves, despite treating other groups in a prejudicial fashion.
• New research illustrating how stereotypes create gender-based disparities in the workplace.

Chapter 7
• A new section on social skills—our ability to get along with others—and their importance in many aspects of social life.
• A new discussion of how even trivial similarities to others (e.g., sharing the same first names) can increase liking for them.
• New information concerning the attributes that we look for in romantic partners change over the course of our relationships with them.

Chapter 8
• A new discussion of the potential benefits of refusing to “go along”, or not yielding to social pressure.
• An expanded discussion of the effectiveness of various techniques (including several new ones) for gaining compliance from others—for getting other people to say “yes” to our requests.
• An entirely new section focused on unintentional social influence: How others influence us even when they are not trying to do so.

Chapter 9
• A new discussion of “crowd-funding”—a form of online helping in which individuals donate money to entrepreneurs without ever meeting them and without expecting anything in return.
• A new discussion of the role of social class in pro-social behavior.
• New findings concerning how feelings of anonymity (produced by darkness) can reduce willingness to help others.

Chapter 10
• New research concerning the role of genes in combination with exposure to stress affects aggression in children.
• A new section on the effects of narcissism on aggression has been included.
• A new section on situational factors that encourage aggressive behavior including gun availability.

Chapter 11
• New research concerning how groups create greater cohesion among their members when their distinctiveness is threatened.
• New research on how being part of a group helps people achieve a greater sense of control in their lives has been added.
• New research on distributive justice rules and how they vary across cultures was added.

Chapter 12
• This completely revamped capstone chapter offers a “social cure” perspective for managing the stresses in our lives and illustrates the critical role of social relationships for health, well-being, and achieving a meaningful life in a changing world.
• The importance of “believing we can change” for helping us weather adversity is described.
• Why practicing self-forgiveness following mistakes can help people change.

New Special Features with Research Insights on Cutting-Edge Topics
To fully reflect current trends in social psychological research and the field’s responsiveness to social change, we now include two new special sections in each chapter—ones that were not present in the previous edition. These new sections, which are labeled “What Research Tells Us...”
About...,” integrate important new research that will capture students’ attention and excite their interest in new emerging topics in social psychology. Some examples are:

- A new research insights section on “People’s Preference for the Status Quo.”
- A new research insights section on “Why Not Controlling Ourselves Can Make Us Feel Good.”
- A new research insights section on “The Role of Nonverbal Cues in Job Interviews.”
- A new research insights section on “Why Some People Conclude They Are Superior to Others.”
- A new research insights section on “The Importance of Belonging and Group Ties.”
- A new research insights section on “Perceived Discrimination and Self-Esteem.”
- A new research insights section on “Social Modeling and Eating.”
- A new research insights section on “Culture and Attitude Processes.”
- A new research insights section on “Biases in Our Beliefs About Inequality.”
- A new research insights section on “The Role of Existential Threat in Prejudice.”
- A new research insights section on “Dramatic Differences in Appearance Between Partners: Is Love Really Blind?”
- A new research insights section on “Two Factors That Can Destroy Love: Jealousy and Infidelity.”
- A new research insights section on “How Much We Really Conform.”
- A new research insights section on “Using Scarcity to Gain Compliance.”
- A new research insights section on “Paying it Forward: Helping Others Because We Have Been Helped.”
- A new research insights section on “How People React to Being Helped.”
- A new research insights section on “The Role of Emotions in Aggression.”
- A new research insights section on “Aggression in the Workplace.”
- A new research insights section on “Dissent and Criticism of Our Groups—‘Because We Care.’”
- A new research insights section on “The Importance of Being Treated With Respect.”
- A new research insights section on “Reducing Posttraumatic Stress Among Veterans.”
- A new research insights section on “The Relationship Between Emotions and Life Satisfaction Within Different Cultures.”

Student Aids

Any textbook is valuable only to the extent that it is both useful and interesting to the students using it. To make this edition even better for students, we have included several student aids—features designed to enhance the book’s appeal and usefulness. Included among these features are the following:

Chapter Objectives: The aims of each major chapter section are presented. With these, students should know what they will learn before they begin each chapter.

Chapter Openings Linked to Important Trends and Events in Society: All chapters begin with examples reflecting current trends in society or real-life events that illustrate important principles of social life. Here are some examples:

1. How people must make judgments—from what college to attend to what health insurance option to select—with incomplete information (Chapter 2)
2. How many famous people have deceived the public and why their deception was so difficult to detect (Chapter 3)
3. Facebook as a medium for presenting ourselves to others (Chapter 4)
4. How our beliefs about climate change are formed (Chapter 5)
5. How protest movements such as “Black Lives Matter” emerge and why there is a racial divide concerning police treatment of citizens (Chapter 6)
6. The powerful, practical advantages of being highly likable (Chapter 7)
7. How swindlers such as Bernie Madoff, who cheated investors out of billions, use social influence for selfish purposes (Chapter 8)
8. How more than 1.5 billion people have been helped to lead better lives by being provided with more efficient—and safer—cooking stoves (Chapter 9)
9. The goals of recent mass shooting perpetrators in the United States are compared with those committing aggression as part of a group to achieve political ends (Chapter 10)
10. The critical role of sharing an identity with an audience for effective communication in groups (Chapter 11)
11. How U.S. Supreme Court Justice Sonia Sotomayor overcame adversity to achieve a happy life (Chapter 12)

Key Points: Every major section of each chapter ends with a brief review of the key points covered.

End-of-Chapter Summaries: Each chapter ends with a summary that recaps the key issues covered.
Special Labels on All Graphs and Charts: To make these easy to understand, we continue to use the “special labels” that are a unique feature of this book.

Supplementary Materials

All excellent texts are supported by a complete package of supplementary material, for both the students and the instructor. This text offers a full array of such aids including:

- **Instructor Manual**: includes chapter outlines, lecture launchers, key terms, in-class, and out-of-class activities.
- **PowerPoint Presentation**: provides a core template of the content covered throughout the text. Can easily be expanded for customization with your course.
- **Test Bank**: includes questions in multiple choice, fill-in-the blanks, short answer and essay response—formats.
- **MyTest**: Create custom quizzes and exams using the Test Bank questions. You can print these exams for in-class use. Visit: http://www.pearsonhighered.com/mytest

Some Concluding Words

Looking back over the changes we have made for this 14th edition, we absolutely believe we have done everything possible to make this edition the best one yet! We sought to create a textbook that fully captures the extent to which modern social psychology reflects, and embraces, the major changes now occurring in the world and illustrate how those affect the social side of life. But only you—our colleagues and the students who use this textbook—can tell us to what extent we have succeeded. So please do send us your comments, reactions, and suggestions. As in the past, we will listen to them very carefully and do our best to use them constructively in planning the next edition.

Our warm regards and thanks!

Word of Thanks

No challenging endeavor, such as writing a textbook, is completed without the assistance of many people. Now that the hard work of preparing this new 14th edition is behind us, we want to take this opportunity to thank the many talented and dedicated people whose help throughout the process has been truly invaluable.

First, our sincere thanks to the colleagues who reviewed the 13th edition and offered their suggestions for ways in which it could be improved. Their input was invaluable to us in planning this new edition: Chris Goode, University of Kansas.

Second, we wish to offer our personal thanks to our editors at Pearson. It was a pleasure to work with Carly Czech and Sutapa Mukherjee. Their helpful suggestions and good judgment were matched only by their enthusiasm and support for the book.

Third, a special thanks to Lois-Ann Freier and Micah Newman whose keen eye and attention to detail during the revision process helped us make this text accurate and more interesting reading for students. Our thanks too go to Lumina Datamatics, Inc., for very careful and constructive copyediting. Their comments were insightful and thought-provoking, which were useful for improving and clarifying our words. We look forward to working with them for many years to come.

Fourth, a very special thanks is owed to Melissa Sacco at Lumina Datamatics who handled an incredible array of details and tasks with tremendous skill—and lots of patience with the authors! In addition, we thank all of those who contributed to various aspects of the production process: to Rimpy Sharma for photo research, to Lumina Datamatics for design work, and the cover design and to Saraswathi Muralidhar for her excellent help with the page proofs and other important aspects of the production process.

We also wish to offer our thanks to the many colleagues who provided reprints of their work, and to the many students who kindly shared their thoughts about the prior edition of this textbook with us. Although these individuals are too numerous to list here, a special note is due to Lara Aknin, Craig Anderson, Manuela Barreto, Monica Biermat, Chris Crandall, Scott Eidelman, Mark Ferguson, Omri Gillath, Alex Haslam, Cath Haslam, John Helliwell, Miles Hewstone, Jolanda Jetten, Anca Miron, Ludwin Molina, Masi Noor, Tom Postmes, Valerie Purdie-Vaughns, Kate Reynolds, Michelle Ryan, Michael Schmitt, Wolfgang Stroebe and Ruth Warner whose research input we gratefully acknowledge.

To all of these outstanding people, and many others too, our warmest regards and a huge thank you!

Nyla R. Branscombe & Robert A. Baron
About the Authors

Nyla R. Branscombe is Professor of Psychology at University of Kansas. She received her B.A. from York University in Toronto, M.A. from the University of Western Ontario, and Ph.D. in 1986 from Purdue University. She has served as Associate Editor for *Personality and Social Psychology Bulletin, British Journal of Social Psychology,* and *Group Processes and Intergroup Relations.* In 2015, she received the University of Kansas Byron A Alexander Graduate Mentor Award.

She has published more than 140 articles and chapters, has been twice the co-recipient of the Otto Kleinberg prize for research on Intercultural and International Relations, and twice the co-recipient of the Society of Personality and Social Psychology Publication Award. She co-edited the 2004 volume *Collective Guilt: International Perspectives,* published by Cambridge University Press; the 2007 volume *Commemorating Brown: The Social Psychology of Racism and Discrimination,* published by the American Psychological Association; the 2010 volume *Rediscovering Social Identity,* published by Psychology Press; the 2013 volume *Handbook of Gender and Psychology,* published by Sage; and the 2015 volume *Psychology of Change: Life Contexts, Experiences, and Identities.*

Her current research addresses a variety of issues concerning intergroup relations from a social identity perspective. How people think about groups that have a history of victimization, when and why privileged groups may feel collective guilt for their past harm doing, and the consequences of experiencing discrimination for psychological well-being have been key topics investigated. She gratefully acknowledges ongoing research support from the Canadian Institute for Advanced Research: Social Interactions, Identity, and Well-Being Program.

Robert A. Baron is Regents Professor and the Spears Professor of Entrepreneurship at Oklahoma State University. He received his Ph.D. in social psychology from the University of Iowa (1968). He has held faculty appointments at Rensselaer Polytechnic Institute; Purdue University; the Universities of Minnesota, Texas, South Carolina, and Washington; Princeton University; and Oxford University. From 1979 to 1981, he was the Program Director for Social and Developmental Psychology at NSF. In 2001, he was appointed as a Visiting Senior Research Fellow by the French Ministry of Research (Universite de Toulouse).

He is a Fellow of APA and a Charter Fellow of APS. He has published more than 140 articles and 45 chapters and has authored/co-authored 49 books in psychology and management. He serves on the boards of several major journals and has received numerous awards for his research (e.g., “Thought Leader” award, Entrepreneurship Division, Academy of Management, 2009 the Grief award, for the most highly cited paper in the field of Entrepreneurship). He holds three U.S. patents and was founder and CEO of IEP, Inc. (1993–2000).

His current research interests focus on applying the findings and principles of social psychology to the field of entrepreneurship, where he has studied such topics as the role of perception in opportunity recognition, how entrepreneurs’ social skills influence their success, and the role of positive affect in entrepreneurship.
